

**Update – Page 67**

Please replace page 67 with the following page that includes the addition of the 2009 Turnkey Lighting Pilot in the Commercial Sector.

## **Pre-rinse Spray Wash Valves**

### **Requirements and Specifications**

Qualified installations require electrically heated dishwashing water in a facility that serves 10 or more meal shifts per week (for example, a facility that serves lunches and dinners, five days a week). If the facility does not meet the shift requirement, the customer may document the reason for an exception to the 10-meal shift rule. The documentation should indicate that the rinse system uses the equivalent amount of energy as 10 or more meal shifts. Exceptions may include commercial bakeries; central school district cafeterias that prepare thousands of hot meals; or catering facilities that may only be used for three parties a week but provide meals for hundreds of people at a time.

### **Additional Documentation Requirements**

No additional requirements.

### **Reimbursement Strategies and Levels**

BPA will reimburse \$150 per qualified installation.

## **2009 Turnkey Lighting Pilot**

### **Requirements and Specifications**

The Turnkey Lighting Pilot Initiative is a Direct Acquisition (DA) initiative conducted with a limited number of utilities throughout the region. BPA will contract with a program partner for third party implementation of the Commercial and Industrial (C&I) Lighting Standard Offer. The pilot will test this implementation approach in the service territories of a very limited number of utilities that (a) have had little or no C&I lighting activity, (b) have little or no administrative program capacity, (c) have adequate opportunity, trade ally base, business association marketing partners and other enabling factors, (d) meet criteria for geographic diversity and certain learning objectives of the pilot, and (e) are willing to consent to third party activity.

### **Additional Documentation Requirements**

None.

### **Reimbursement Strategies and Levels**

Incentive amounts under this limited availability pilot effort will be identical to those available through the C&I Lighting Standard Offer. The pilot will use the current versions of the existing building and new construction lighting calculator spreadsheet. The program partner will pay all incentives directly.

Slice/Block customers will not be subject to the Load Decrement requirement for the 2009 Turnkey Lighting Pilot.
