

Performance Tested Comfort Systems® Trainers

The following trainers have demonstrated the certifications and experience required to train and certify installation technicians for the BPA PTCS program and have elected to be listed here. This list is updated monthly and is grouped by trainings provided and state. PTCS certification training requires a minimum level of knowledge. Technicians who lack duct sealing or heat pump experience should consider training prior to attempting PTCS certification. BPA provides more information on preparing for PTCS certification online at www.bpa.gov/goto/reshvac.
