Financial Health

An organization’s financial condition that enables it to deliver on its mission under any circumstance.

- **Solvent**: Able to pay all obligations
- **Resilient**: Able to withstand or recover quickly from difficult conditions
- **Stable**: Able to replicate results
Low borrowing costs.

- Bonneville’s $15.1 billion debt portfolio included $6.8 billion of long-term non-federal debt as of 9/30/15. Our capital investment program relies heavily on access to the capital markets.
- Total interest expense in FY15 was $573 million
- A stronger credit leads to lower interest cost and improved terms with counterparties
- A healthy financial profile ensures market access for BPA-backed bonds (even in times of market dislocation, e.g., 2008 financial crisis).
Benefits of Financial Health

Stability.

- Financial health ensures BPA is prepared to deal with unforeseen events without drastic measures and/or disruption to our operations (financial reserves).

- Consistent and strong financial performance provides validation that we are operating the utility appropriately and not jeopardizing the long-term prospects of regional electric service and its cost.

- A healthy BPA assures rating agencies and investors who evaluate our customer’s debt that the Region is well equipped to handle a variety of conditions, both from a reliability and cost perspective.
Measures of Financial Health

Quantitative.

- **Debt Service Coverage (DSC) ratio.** Compares annual required payments to bondholders and other contractual arrangements to the amount of revenues available after we pay our expenses (e.g., “Net Revenues are two times (2.0x) debt service”).

Measures of Financial Health

Quantitative.

- **Change in Capital Related Costs between rate periods.** Represents current capital related costs less prior period capital related costs divided by prior period capital related costs.
  - Relative to inflation

- **Change in IPR Costs between rate periods.** Represents current IPR costs less prior period IPR costs divided by prior period IPR costs.
  - Relative to inflation
Qualitative.

- **Capital Investment Strategy.** Is BPA investing adequate resources to sustain its asset fleet? Is BPA making strategic investments to expand its asset fleet?

- **Business Strategy.** Operationally, what are the risks to BPA’s business?
  - What could significantly reduce revenues?
  - What could significantly increase expenses?

- **Revenue Base.** How healthy is the source of BPA’s revenues (i.e., customer strength, contracts, market pressures)?

- **Management.** How experienced is management and how have they performed?

- **Liquidity Plan.** What mechanisms does BPA have to obtain money to repay bondholders if normal operating revenues are dramatically interrupted or reduced for some reason
Common policies, goals and targets for public power entities include:

- Minimum forecast coverage targets that are used to guide ratemaking decisions
- Maintenance of a minimum days cash on hand target
- Adherence to debt ratio targets
- Automatic revenue adjustment mechanisms to ensure recovery of variable costs or meet specific targets

BPA is a unique entity in the utility industry

- Department of Energy entity
- Limited access to U.S. Treasury borrowing
- Limited ability to access capital markets through third-party financings
- FCRPS is unlike any other resource

Given our unique nature, we believe some of our qualitative factors are very important to our financial health

- Management commitment to sound financial planning and policies
- Competitive resources that provide the Region with an attractive cost of power
Bonneville is a financially healthy organization.

Our stakeholders and every Bonneville team member are committed to keep it that way.
