

I-5 Corridor Reinforcement Project

Guide to finding your property online

In June 2014, BPA created an updated version of the interactive map that reflects recent adjustments to proposed transmission tower and access road locations on BPA's preferred alternative. Follow the instructions below to find your property or other locations on the interactive map.

Step 1:

From the project website www.bpa.gov/goto/i-5, select "June 2014 interactive map" under "News and Highlights" on the right side of the page. You will leave BPA's website and enter the interactive map site.

I-5 Corridor Reinforcement

New interactive map of preferred alternative

Since BPA published the draft environmental impact statement (EIS) in 2012 and identified the preferred alternative, we have reviewed comments, met with landowners, listened to many concerns and completed more analysis. BPA has adjusted some tower and access road locations to reduce impacts along the preferred alternative. The final adjustments to the preferred alternative are shown on our [interactive map dated June 2014](#).

The original [interactive map](#) (updated in November 2012), which included all four action alternatives and identified the preferred alternative, is still online and available for review and reference. You can compare the June 2014 map and the 2012 version to see changes that have been made in the locations of interest to you.

Current project schedule and activities

We now plan to release our final EIS in late 2015, followed by a record of decision in early 2016. This allows us time to incorporate the revised preferred alternative in the final EIS, update our analysis and respond to the comments

News and Highlights

[June 2014 project update](#)

This map shows only final adjustments to the preferred alternative.

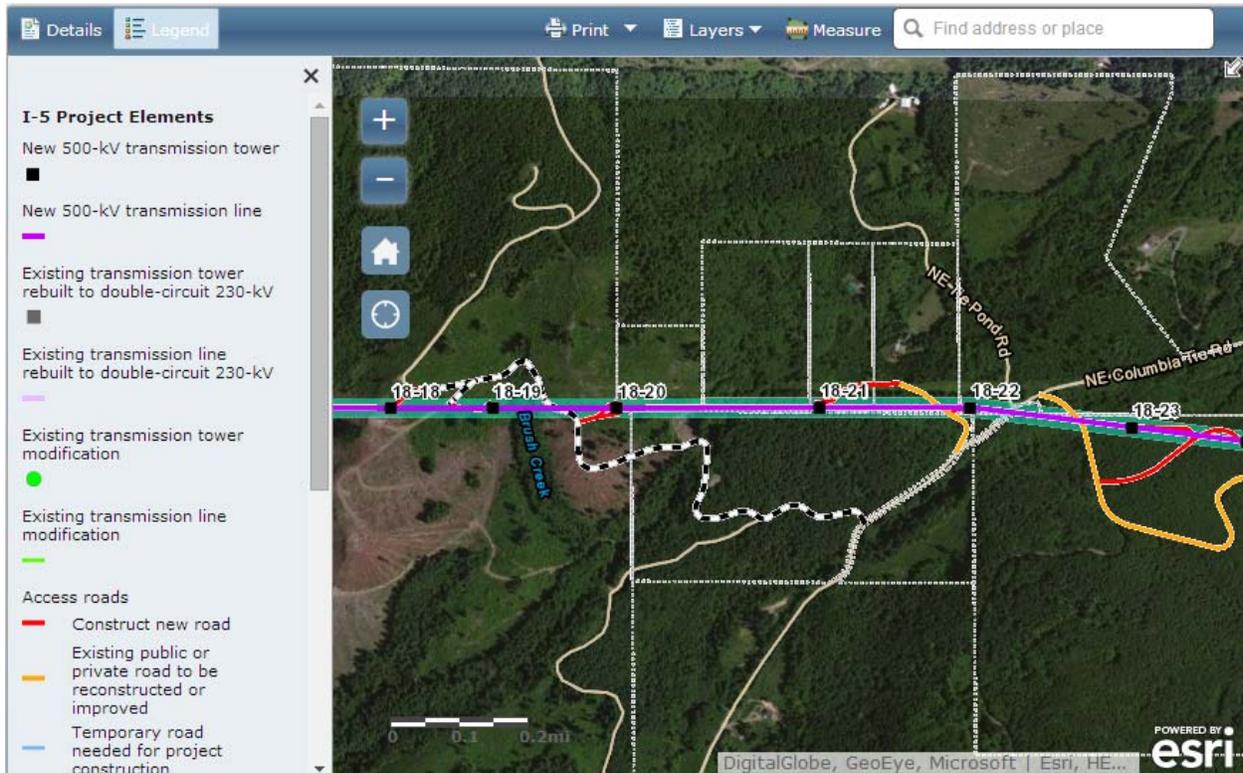

Step 2:

Type your property address or nearest intersection in the "Find address or place" search box at the top right corner of the map page. Press "Enter" on your keyboard to begin the search.

Step 3:

The map will zoom in to the address you provided, allowing you to see if proposed locations of transmission towers and access roads on BPA's preferred alternative are near the property. Use the tools on the top left corner of the map to zoom in and out of the area displayed, or you can "drag" the map to scroll to a different area you would like to view.

November 2012 Interactive Map

The original interactive map (updated in November 2012), which included all four action alternatives and identified the preferred alternative, is still available for review and reference on the project website www.bpa.gov/goto/i-5. Click on "November 2012 Interactive Map" under "News and Highlights" on the right side of the page.

Project Schedule

BPA continues to evaluate the preferred alternative and will release updated potential environmental and community impacts in the final environmental impact statement, expected in 2015.
