

I-5 Corridor Reinforcement Project

June 2013

Comments under consideration

BPA received more than 700 communications during the public comment period for the I-5 Corridor Reinforcement Project Draft Environmental Impact Statement. The project team is reviewing your input and will respond to comments in the final EIS. During the next few months, BPA will meet with individual property owners to discuss potential property impacts from the agency's preferred alternative.

Comments received during the 132-day comment period are posted online at www.bpa.gov/goto/i5. Requests for map or logistical information are generally not posted on the project website. Click on "Search Comments" on the left hand side of the page to see all comments, or to search for a particular name or keyword. BPA will post a summary of comments received on the draft EIS by July 1.

BPA in your community

This summer, we will attend several fairs and festivals throughout southwest Washington. We'll have general project information and people available to answer questions.

July 12-14 Amboy Territorial Days

July 18-19 Castle Rock Fair

July 19-21 Battle Ground Harvest Days

July 26-27 Camas Days
