DATE: December 6, 2012

ATTN OF: KEP-4

SUBJECT: Environmental Clearance Memorandum

TO: Michael Marleau – TEP-TPP-1
    Project Manager

**Proposed Action**: Lane Substation 500/230-kV Transformer Phase Separation Project

**Project Work Order Number**: 00298187

**Categorical Exclusion Applied (from Subpart D, 10 C.F.R. Part 1021)**: B4.6 Additions or modifications to electric power transmission facilities

**Location**: Lane Substation, Lane County, Oregon Township 17 South, Range 5 East, Section 36

**Proposed by**: Bonneville Power Administration (BPA)

**Description of the Proposed Action**: BPA proposes to increase the physical distance that separates each phase of the 500/230-kiloVolt transformer banks at BPA’s Lane Substation. The reason for the increased distance is to minimize the effects of a transformer fire or explosion as outlined in the Institute of Electrical and Electronic Engineers, Inc. guidelines for substation fire suppression. A new rigid bus would also be installed to re-connect to the re-spaced transformers. In addition, an oil spill secondary containment system would be installed for the new transformer footings.

All construction activities would occur within the existing substation yard or previously disturbed facility footprint. Once modifications are completed the sites would be fully restored.

**Findings**: BPA has determined that the proposed action complies with Section 1021.410 and Appendix B of Subpart D of the Department of Energy’s (DOE) National Environmental Policy Act (NEPA) Regulations (57 FR 15144, Apr. 24, 1992, as amended at 61 FR 36221-36243, July 9, 1996; 61 FR 64608, Dec. 6, 1996, 76 FR 63764, Nov. 14, 2011). The proposed action does not present any extraordinary circumstances that may affect the significance of the environmental effects of the proposal. The proposal is not connected [40 C.F.R. 1508.25(a)(1)] to other actions with potentially significant impacts, has not been segmented to meet the definition of a categorical exclusion, is not related to other proposed actions with cumulatively significant impacts [40 C.F.R. 1508.25(a)(2)], and is not precluded by 40 C.F.R. 1506.1 or 10 C.F.R. 1021.211.

Moreover, the proposed action would not (i) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, (ii) require siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities, (iii) disturb hazardous substances, pollutants, contaminants, or Comprehensive Environmental
Response, Compensation and Liability Act-excluded petroleum and natural gas products that pre-exist in the environment such that there would be uncontrolled or unpermitted releases, (iv) have the potential to cause significant impacts on environmentally sensitive resources, or (v) involve genetically engineered organisms, synthetic biology, governmentally designated noxious weeds, or invasive species, unless the proposed activity would be contained or confined in a manner designed and operated to prevent unauthorized release into the environment and conducted in accordance with applicable requirements.

This proposed action meets the requirements for the Categorical Exclusion referenced above. We therefore determine that the proposed action may be categorically excluded from further NEPA review and documentation.

Attachment:
Environmental Checklist for Categorical Exclusions
## Environmental Checklist for Categorical Exclusions

**Name of Proposed Project:** Lane Substation 500/230-kV Transformer Phase Separation Project

**Work Order #:** 00298187

This project does not have the potential to cause significant impacts on the following environmentally sensitive resources. See 10 CFR 1021, Subpart D, Appendix B for complete descriptions of the resources. This checklist is to be used as a summary – further discussion may be included in the Categorical Exclusion Memorandum.
