REPLY TO
ATTN OF: KEPR-Covington

SUBJECT: Environmental Clearance Memorandum

TO: Steve Scott
Line Foreman III – TFNF-Snohomish

**Proposed Action**: Wood pole replacement at selected locations along the Murray–Custer No. 1 transmission line right-of-way

**PP&A Project No.**: 2271

**Categorical Exclusion Applied (from Subpart D, 10 C.F.R. Part 1021)**: B1.3 Routine maintenance activities.

**Location**: The proposed project is located in Snohomish and Skagit counties, Washington.

**Proposed by**: Bonneville Power Administration (BPA), Snohomish District.

**Description of the Proposed Action**: BPA proposes to replace deteriorating wood poles and associated structural/electrical components (e.g. crossarms, insulators, guy anchors) at existing H-frame structures along the subject transmission line. Wood pole replacements will be in-kind and will utilize the existing holes to minimize ground disturbance. If necessary, an auger will be used to remove any loose soil from the existing hole prior to new wood pole replacement. Approximately 12 wood pole structures ranging from structures 1/1 to 23/1 have been identified for replacement in 2012, with the potential for additional wood pole replacements in the future.

The transmission line right-of-way corridor crosses through state and privately-owned land that is primarily agricultural, forested, and rural residential property. The terrain is rolling to flat. There is adequate, existing access to all of the structures along this transmission line corridor and no access road work is anticipated at any location. Only minor landing improvement is planned at two of the proposed locations.

**Findings**: BPA has determined that the proposed action complies with Section 1021.410 and Appendix B of Subpart D of the Department of Energy (DOE) National Environmental Policy Act (NEPA) Regulations (57 FR 15144, April 24, 1992, as amended at 61 FR 36221-36243, July 9, 1996; 61 FR 64608, Dec. 6, 1996, 76 FR 63764, Nov. 14, 2011). The proposed action does not present any extraordinary circumstances that may affect the significance of the environmental effects of the proposal. The proposal is not connected [40 C.F.R. 1508.25 (a)(1)] to other actions with potentially significant impacts, has not been segmented to meet the definition of a categorical exclusion, is not related to other proposed actions with cumulatively significant impacts [40 C.F.R. 1508.25 (a)(2)], and is not precluded by 40 C.F.R. 1506.1 or 10 C.F.R. 1021.211. Moreover, the proposed action would not (i) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, (ii)
require siting and construction or major expansion of waste storage, disposal, recovery, or
treatment facilities, (iii) disturb hazardous substances, pollutants, contaminants, or
Comprehensive Environmental Response, Compensation and Liability Act-excluded petroleum
and natural gas products that pre-exist in the environment such that there would be uncontrolled
or unpermitted releases, (iv) have the potential to cause significant impacts on environmentally
sensitive resources, or (v) involve genetically engineered organisms, synthetic biology,
governmentally designated noxious weeds, or invasive species, unless the proposed activity
would be contained or confined in a manner designed and operated to prevent unauthorized
release into the environment and conducted in accordance with applicable requirements.

Based on the provisions identified on the attachment, this proposed action meets the
requirements for the Categorical Exclusion referenced above. We therefore determine that the
proposed action may be categorically excluded from further NEPA review and documentation.
