Proposed Action: Allow installation of new fiber optic cable

PP&A Project No.: 1866

Budget Information: Work Order # 00184006

Categorical Exclusion Applied (from Subpart D, 10 C.F.R. Part 1021): B4.7 Adding fiber optic cable to transmission structures or burying fiber optic cable in existing transmission line rights-of-way.

Location: Ross Complex, Vancouver, Washington

Proposed by: Bonneville Power Administration (BPA)

Description of the Proposed Action: BPA proposes to allow Comcast Cable Communications, Inc. (Comcast) to install fiber optic cable to the existing T-Mobile cellular facility located at the Ross Complex. Comcast will place conduit using underground boring equipment through which fiber optics cable will be installed. Boring will run north from pole NT/5202 along NE 18th Avenue, then west along NE Ross Street, then cross NE 15th Avenue. Boring will continue north across NE Ross Street and tie to MH #125T, intercepting existing 4” empty conduit. Newly installed and existing empty conduit will be used to install fiber optics cable to the existing T-Mobile equipment on NE North Road on the Ross Complex. 15 feet of new conduit and fiber cable (8 feet vertically from the ground up along the side of the T-Mobile equipment and 7 feet horizontally across the top of the T-Mobile equipment) will be installed to make the final fiber connection to the T-Mobile cabling structure. No work will be performed on the tower.

Findings: BPA has determined that the proposed action complies with Section 1021.410 and Appendix B of Subpart D of the Department of Energy’s (DOE) National Environmental Policy Act (NEPA) Regulations (57 FR 15144, April 24, 1992, as amended at 61 FR 36221-36243, July 9, 1996; 61 FR 64608, Dec. 6, 1996). The proposed action does not present any extraordinary circumstances that may affect the significance of the environmental effects of the proposal. The proposal is not connected [40 C.F.R 1508.25(a)(1)] to other action with potentially significant impacts, is not related to other proposed actions with cumulatively significant impact [40 C.F.R. 1508(a)(2)], and is not precluded by 40 C.F.R. 1506.1 or 10 C.F.R. 1021.211. Moreover, the proposed action would not (i) threaten a violation of applicable statutory, regulatory, or permit requirements for environment, safety, and health, (ii) require
siting and construction or major expansion of waste storage, disposal, recovery, or treatment facilities, (iii) disturb hazardous substances, pollutants, contaminants, or Comprehensive Environmental Response, Compensation and Liability Act - excluded petroleum and natural gas products that pre-exist in the environment such that there would be uncontrolled or unpermitted release, or (iv) adversely affect environmentally sensitive resources. The proposal will not affect any listed threatened or endangered species, or critical habitat under the Endangered Species Act, or Essential Fish Habitat under the Magnuson-Stevens Fishery Conservation and Management Act, or historic properties under the National Historic Preservation Act.

This proposed action meets the requirements for the Categorical Exclusion referenced above. We therefore determine that the proposed action may be categorically excluded from further NEPA review and documentation.
