Palisades-Goshen Transmission Line Rebuild Project

Summer field work beginning!

The Bonneville Power Administration's Palisades-Goshen 115-kilovolt transmission line is in need of repair and upgrades in order to improve its reliability and accommodate for future load growth in the area. The line extends from the Palisades Dam in eastern Idaho about 52 miles west to the Goshen Substation south of Idaho Falls, Idaho. Field work will begin on the project soon. Land-owners in the area can expect to see BPA personnel on the rights-of-way inspecting structures and access roads, and conducting environmental and engineering surveys. As part of BPA's ongoing maintenance program, crews have scheduled vegetation maintenance activities within the existing rights-of-way and access roads.

If you have questions or need more information about the scheduled activities, contact BPA's Project Manager, Mark Korsness at (800) 622-4519. Thank you for your cooperation in this effort.
