<i>Sparganium fluctuans</i>	Water Bur-Reed	T		
<i>Spiraea densiflora</i> var. <i>splendens</i>	Subalpine Spiraea	R2		
<i>Subularia aquatica</i>	Water Awlwort	R1		H
<i>Synthyris pinnatifida</i> var. <i>lanuginose</i>	Cut-Leaf Synthyris	T		
<i>Utricularia intermedia</i>	Flat-Leaved Bladderwort	S		
<i>Viola renifolia</i>	Kidney-Leaved Violet	S		H
<i>Whipplea modesta</i>	Yerba de Selva	R1		H

**Description of Codes**

Historic Record:

H indicates most recent sighting in the county is before 1977.

**State Status**

"State Status of plant species is determined by the Washington Natural Heritage Program. Factors considered include abundance, occurrence patterns, vulnerability, threats, existing protection, and taxonomic distinctness."

Values include:

E = Endangered. In danger of becoming extinct or extirpated from Washington.

T = Threatened. Likely to become Endangered in Washington.

S = Sensitive. Vulnerable or declining and could become Endangered or Threatened in the state.

X = Possibly extinct or extirpated from Washington.

R1 = Review group 1. Of potential concern but needs more fieldwork to assign another rank.

R2 = Review group 2. Of potential concern but with unresolved taxonomic questions.

**Federal Status**

Federal Status under the U.S. Endangered Species Act (ESA) as published in the Federal Register:

LE = Listed Endangered. In danger of extinction.

LT = Listed Threatened. Likely to become endangered.

PE = Proposed Endangered.

PT = Proposed Threatened.

C = Candidate species. Sufficient information exists to support listing as Endangered or Threatened.

"SC = Species of Concern. An unofficial status, the species appears to be in jeopardy, but insufficient information to support listing."

NL = Not Listed. Used when two portions of a taxon have different federal statuses.
