

## **Pesticide and Right-of-Way Maintenance Support**

### **Labels and Material Safety Data Sheets**

Crop Data Management Systems, Inc., or CDMS, probably has the most up to date information regarding pesticide labels with corresponding MSDSs. Use the link below to go directly to the CDMS search page. You must know the trade name of the herbicide you wish to look up. Type the trade name in the search window, hit enter and if it's in their database a listing will be displayed for the label and MSDS. If available, supplemental labels, California labels and other information may be listed. To read and printout labels you must have the Adobe Acrobat Reader installed on your computer. If you need it, use the link above to get it.

The logo for CDMS (Crop Data Management Systems) features the letters "CDMS" in a blue, serif font, underlined, and centered within a yellow rectangular background.
