Re: Freedom of Information Act Request - Fee waiver requested, Whistling Ridge Energy Project

Dear FOIA Officer:

Pursuant to the federal Freedom of Information Act, 5 U.S.C. § 552, Friends of the Columbia Gorge ("Friends"), requests from the Bonneville Power Administration ("BPA") access to and copies of agency records related to the BPA's review of the Whistling Ridge Energy Project ("WREP" or "Project"). This request covers all records in the following categories added to BPA's files during the following time period: **July 2, 2014 through January 23, 2015.**

The request is limited to the following categories of records:

- Any materials submitted by Whistling Ridge Energy LLC ("WRE") regarding its pending generation interconnection request;
- Any Transmission Service Requests or similar documents submitted to BPA regarding the WREP;
- Any communications between the BPA and the following persons and entities regarding the WREP:
 - Washington Energy Facility Site Evaluation Council ("EFSEC");
 - state agencies or officials (including elected officials);
 - other federal agencies or officials (including elected officials);
 - Whistling Ridge Energy LLC ("WRE"), including all related entities such as the SDS Lumber Company, Broughton Lumber Company, and

- Stevenson Land Company, as well as WRE's attorneys and other representatives; and
 - WRE's consultants, including but not limited to URS Corp. and West Inc.
- Any meeting notes, agendas, or other related records generated from meetings between BPA, EFSEC, WRE, and consultants.

Friends would like to receive the information in electronic format.

Please waive any applicable fees. Friends is requesting this information in the public interest and not for any commercial use. The request will serve the public interest because it will contribute significantly to public understanding of government operations and activities related to the BPA's review of environmental impacts of the Project and the process for approving new interconnections to the regional energy grid. Materials would be provided to a federally registered non-profit organization that reviews and comments on environmental review and permitting processes for new development within the Columbia River Gorge. Waiving fees would facilitate this work and allows the organization to disseminate information to the interested public. Information could be disseminated through the organization's membership, print newsletters, e-mail newsletters, partner organizations, and numerous media contacts. The organization would not obtain any monetary profit from the release of information or from a waiver of fees. The information is sought solely for the purpose of advancing the organization's public interest mission.

In the event that any applicable fees are not waived, please contact me directly if responding to the request would generate costs exceeding \$200.

If this request is denied in whole or part, Friends asks that the BPA provide a withholding index and justify all withholdings by reference to specific exemptions of the Public Records Act. We also expect that the BPA will release all segregable portions of otherwise exempt material. We reserve the right to appeal any decision to withhold any information or to deny a waiver of fees.

If you have any questions about processing this request, you may contact me during business hours at 971-634-2032 or rick@gorgefriends.org.

Friends looks forward to your response within 20 days, as the statute requires.

Thank you for your assistance.

Sincerely,

Richard Till
