---

To whom it may concern:

I am an Assistant Professor in the Electrical Engineering Department, Chiang Mai University, Thailand. I have been doing research involving transmission network analysis. My current research involves performance comparison of ACSR and HTLS conductors. I would like to examine corona and EMF levels by using BPA Corona and Field Effects Program, given that the program has been widely used and accepted by electric utilities around the globe. Under the FOIA, I would like to request an electronic copy of the program from BPA for my use in academic purpose. Please let me know if you need further information.

Best regards,

Somboon Nuchprayoon, PhD, PEng, SMIEEE
