Senior Vice President of Transmission Services

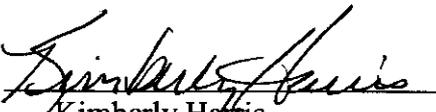

Re: Network Open Season

Dear Vickie:

I am pleased to let you know that Puget Sound Energy favors participating in the Network Open Season. While PSE has not fully reviewed all of the documentation proposed as part of the open season process, the open season concepts seem to be a very good step to take toward meeting the region's needs for increased transmission capacity. PSE is also working to advance that objective, and we would be interested in exploring with you ways in which BPA and PSE might work together to develop transmission projects to address the region's needs, whether those projects result from the Network Open Season or otherwise.

Very truly yours,

Puget Sound Energy, Inc.
